### **DETAILED ACTION**

This application has been examined. The claims 1-2 are pending. The examination results are as following.

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the 1. basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Tokimoto et al. (US 5,202,675).

Regarding claim 1, Tokimoto et al. discloses in figs. 13a, 14a, a method of displaying moving image sequences into each window of a passenger train moving in a tunnel, by the method comprising: installing a plurality of vertical one-dimensional light emitting bars (a, b, c) mounted on a tunnel sidewall, that are placed in a row at window level of the train at specific intervals in the direction of the train movement, wherein the light emitting bars emit light, modulated according to a desired image frame to be displayed forming the horizontal dimension of the desired image frame using movement of an observer, onboard the train, relative to one of the vertical one-dimensional light emitting bars wherein start time of each image frame is synchronized with each window passing the one of the light emitting bars and the frequency of modulation of the light emitting bars is synchronized with the train velocity (see col. 10, lines 16-25, and lines 33-40); and forming a successive moving image sequence using the plurality of vertical one-dimensional light emitting bars, thus presenting two-dimensional moving image

Application/Control Number: 10/065,002

Art Unit: 2677

visible to the observer (see fig. 14a, see abstract, see the display zone is for displaying a succession of images).

Regarding claim 2, Tokimoto et al. discloses in figs. 13a, 14a, a system of displaying moving image sequences into each window of a passenger train moving in a tunnel comprising a train velocity and position detector (see fig. 1, see sensor zone); a plurality of vertical one-dimensional light emitting bars (a, b, c, fig. 14a) mounted in row at a window level of the train at specific intervals in the direction of the train movement, wherein each light emitting bar comprises a control circuit (see sensor circuit 11, fig. 1) and a plurality of full-color light emitting diodes (LED) aligned vertically at a specific interval; and signal cables from a train velocity and position detector to the light emitting bars used to time-synchronize the modulated light emitted by the light emitting bars with the train velocity and position (see co. 10,lines 116-40).

### Response To Arguments

- 3. Applicant's arguments with respect to claims 1-2 filed on 9/14/05 have been considered but are most in view of the new ground(s) of rejection.
- 4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE

MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after

Application/Control Number: 10/065,002 Page 4

Art Unit: 2677

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimnhung Nguyen whose telephone number is (571) 272-7698. The examiner can normally be reached on MON-FRI, FROM 8:30 AM-5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amr Awad can be reached on (571) 272-7764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
